DETAILED ACTION

1. Applicant's election of claims 6-12 and 16-18 in the reply filed on 8/18/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Election/Restrictions

2. The elected claims 6-12 and 16-18 are directed to the following patentably distinct species of the claimed invention:

Group I (claims 6-9): a method of confusing a reverse engineer comprising the step of forming an artifact edge of a conductive layer of a false semiconductor device without sidewall spacers mimics an artifact edge of a conductive layer of a semiconductor device having sidewall spacers;

Group II (claims 10-11): a method of camouflaging a non-operational circuit structure comprising the step of forming a conductive block layer mask for defining a location of an artifact edge of a conductive layer;

Group III (claim 12): a method of protecting an integrated circuit design comprising modifying a silicide block mask used during the manufacture of a false transistor;

Group IV (claims 16-18): a method of hiding a circuit function of a circuit comprising the step of forming a width of a conductive layer being less than a width of

the at least one active region so that the conductive layer yields an artifact edge and functions in an unanticipated fashion.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phat X. Cao whose telephone number is (571) 272-1703. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wael Fahmy can be reached on (571) 272-1705. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
